There are many different types of icons that you can use in your design. Some icons are simple and easy to understand, while others are more complex and require more context. The key is to choose icons that are clear and consistent with the overall design. Icons can be used to represent a wide range of concepts, from basic actions like 'add' or 'delete' to more abstract ideas like 'search' or 'login'. It's important to consider the user's perspective when choosing icons, as they should be intuitive and easy to use.
